3+ years designing enterprise software for complex operational workflows. Designed data-dense interfaces for multi-tenant systems serving distributed teams. Skilled at delivering intuitive and scalable solutions through user-centered design and cross-functional collaboration.

Professional Experience

Independent Product Designer | Bengaluru (Aug 2025 - Present)

- Upskilled in technical execution using Claude Code and Figma MCP to translate designs into production code; shipped an image-optimized Next.js and Tailwind CSS application.

Associate Product Designer | Condé Nast, Bengaluru (Aug 2022 - Jul 2025)

- Owned end-to-end design for integrated analytics across multiple editorial workflows. Conducted user research with editorial partners to understand user needs, and collaborated with product managers and engineers to define requirements. Surfaced key metrics and metadata directly within existing touchpoints, eliminating context-switching and enabling fast decisions.
 - Designed navigation and discovery improvements across key Content Management System (CMS) touchpoints, improving workflow efficiency. CMS satisfaction increased 11 percentage points YoY with heatmap data showing significantly higher tool usage.
 - Designed the cross-market republishing tool to streamline image rights evaluation across international teams. Simplified complex legal and operational requirements; tool satisfaction increased 13 percentage points YoY.
 - Contributed to the internal design system and component libraries by designing and documenting new components, text and color tokens, and UI pattern guidelines.
 - Designed the slideshow editing experience for the CMS, enabling editors to effortlessly create inline slideshow galleries. Achieved strong adoption with ~100 slideshows per month.
